

BAKER PARK TRAIL

There is nothing better than a brisk walk in the park no matter what the weather. I walked the three main loops of Baker Park during the Holidays and was thrilled to spot a Great Blue Heron just standing beside Carroll Creek watching for his or her dinner. The Mallard Ducks were just laughing at me as if to say "have you never seen a Heron before." In Baker Park you can also spot many Squirrels and Canadian Geese.

During the Winter you can enjoy a good view of the Clustered Spires from the park. In the Summer you can hear concerts at the band shell.

If you tire of walking you can do many other activities in the park like tennis, softball, jogging, and even cross country skiing when it snows. In the Summer you can take a dip in the pool.

It is easy to walk a mile in Baker Park. Just start at any one spot and make one large loop pass the bell tower, the swimming pool, and Culler Lake. Return to where you started and you have walked one mile.
